

Equipment for harvesting — Combine harvester — Sickle guards or fingers — Dimensions

Matériel de récolte — Moissonneuses-batteuses — Doigts de barre de coupe — Dimensions

First edition — 1981-11-01

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 5717 was developed by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, and was circulated to the member bodies in April 1980.

It has been approved by the member bodies of the following countries :

Australia	Germany, F.R.	Spain
Austria	India	Sweden
Belgium	Italy	Switzerland
Brazil	Korea, Dem. P. Rep. of	United Kingdom
Denmark	Korea, Rep. of	USA
Egypt, Arab Rep. of	New Zealand	USSR
Finland	Portugal	
France	Romania	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

China
Poland

This International Standard cancels and replaces International Standard ISO 1168-1973, of which it constitutes a technical revision.

Equipment for harvesting — Combine harvester — Sickle guards or fingers — Dimensions

0 Introduction

The aim of this International Standard is to guarantee interchangeability of sickle guards or fingers of combine harvesters with reference to that type of sickle guard which has no ledger plate.

1 Scope and field of application

This International Standard lays down the dimensions for the sickle guard or finger and which are necessary to guarantee interchangeability of sickle guards or fingers.

It is applicable to both the single and the double types of sickle guards or fingers.
